BPM-300 SOFTWARE REVISION HISTORY

7.1.8 10/09/23

- Correct program shutdown after exit of Reports with Analyze ON.

7.1.7 02/08/23

- Shutdown Test USBrecv Thread before closing USB port.

7.1.6 07/28/22

- Expand Winver(*) to return Windows 11 if applicable; show full OS details in Help | About tooltip; Use new RetinoGraphics address in Help | About and Reports header; Use DIALOG SEND instead of DIALOG END to end Repoprts.

7.1.5 07/25/21

- Correct array bounds problem in SQL_ExecStmt and gFhndl.

7.1.4 07/01/21

- Use web-based tutorial; Compile option (%DIM) to make desktop dark if DIM is the default test background (in Utils|Misc.)

7.1.3 04/17/21

- Create CSV waveform Export as a UTF-8 file; Adjust left panel, ‘Yes’, ‘No’, ‘OK’, ‘Cancel’ and Protocol button widths for language differences.

7.1.2 01/20/21

- Correct initial menu state to %MF_GRAYED.

7.1.1 01/02/21

- Make additional dialogs and listboxes variable width for language variations.
- Increase Tooltip delay time; Use DB Connection (*.mdb, *.accdb) if available, otherwise use (*.mdb); Make Help|About 'OK' button the same size as others; Add %SS_NOPREFIX to Help|About|Translation label to display "&" correctly.
- Fix a Tooltip memory leak; Larger text size for tooltips; Use smaller text size for STATUS1 long messages; Adjust STATUS2, some button widths, and dialogs to better handle non-English languages; Add debug settings to show text sizes & Windows scale actor; Correct tooltip display in Reports|Print; Add special 'debug' tooltip to Help|About|OS Version.
- Use GRAPHIC TEXT SIZE statement rather than function; Add tooltip to Test|Protocol names.

7.1.0 08/19/20

- Major rewrite to handle Unicode character sets; Import previous version defaults if they exist; Show language in Utils|User.

7.0.9 07/20/20

- **NOT RELEASED**
- Make better use of hi-res displays; Increase Menu Text size; Correct display of background illumination value on 'demo' waveforms.
